- Ensure the data pulled from invoices is correct using optical machine learning, and human spent on reconciling errors.
- Store invoices of all types or longer, with permission-company employees.
- friendly experience for employees and holistic reporting of travel, expense, in a single, integrated spend management platform.
- Track unsubmitted invoices and in-process approvals in real time, matching them with automatic audit trails that help reduce bottlenecks and promote accountability.
- Explore pre-spend control, which allows companies without a procurement process to easily create purchase orders in Concur Invoice and approve spend before it happens.
- thresholds, exceptions, every time and shorten the processing time for data entry into the ERP.
- Automate two- or three-way matching to existing purchase orders or those created in Concur Invoice to consolidate documentation and help involved parties focus on error analysis and decision-making.
